AR EduVision Book

AR EduVision Book

Augmented Reality for Education Vision

To everyone has the passion of knowledge ...

DEDICATION

We dedicate this book to our loving parents.

We never have experienced love like this, they have taught us, shown us, and helped us understand how to use what we have learned to help people. We are thankful for their sacrifice, patience, and understanding that were inevitable to make this work possible. Their sacrifice had inspired us from the day we learned how to read and write until what we have become now. We cannot find the appropriate words that could properly describe our appreciation for their devotion, support and faith in our ability to achieve our dreams.
